In Britain, there are an estimated 47,000 rapes every year. And each year, an estimated 300,000 women are sexually assaulted (British Crime Survey 2001). Yet Britain's conviction rate is the lowest ever, at just 5.3 per cent. When Reclaim The Night marches were started in the 1970s, women were appalled that only 1 in 3 rapists were ever convicted; today that figure is 1 in 20. This is why the London Feminist Network have revived the tradition of Reclaim The Night. All women have the right to use public space both in the daytime and after dark without the fear of sexual harassment and assault. Join us and take back your night.

Called by: **London Feminist Network**
